

Artcare™ Archival *plus* Protection

Alpharag Artcare products, featuring the patented MicroChamber technology, provide a preventative conservation protection unavailable with any other rag board. A unique combination of zeolites and buffers traps and neutralizes oxidizing gases, other pre-acidic gases, and degradative by-products – giving Artcare boards the ability to actively protect art and photographs against attack by external pollutants and internal vices.

Museum Quality *Protection*

Only Artcare offers active preservation for treasured art and photographs that your customers will value forever.

	Artcare™ Archival Matboards	OTHER Conservation Matboards
Slows art and paper degradation	YES	NO
Neutralizes acid by-products	YES	NO
Protects against damaging pollutants	YES	NO
Acid-free and lignin-free	YES	YES
Fade and bleed resistant	YES*	YES*
Buffered to maintain alkaline pH	YES	YES

* Bainbridge quality audits every production lot to ensure conformance to industry standards for optimum fade and bleed resistance. Not all conservation matboards meet these stringent standards.

Artcare™ Archival
Protection

OTHER
Archival Protection

In independent lab tests, the images above were exposed to concentrated doses of nitrogen dioxide, the most common air pollutant. Both were tested in the same testing chamber for the same length of time. Neither were exposed to light during testing. The results prove the proactive performance of the Artcare Archival System.

**Conserving the environment
is as important to us
as conserving artwork.**

Alpharag matboard is manufactured from 100% cotton, an annually renewable and environmentally friendly resource. All materials used in our manufacturing process meet or exceed stringent environmental guidelines. Made in the U.S.A. Alpharag Artcare is 100% earth-friendly.
